Education

Indian Institute of Information Technology, Sonepat   Sonepat, Haryana

CSE, B.Tech | CGPA: 8.87   12/2020 – 07/2024

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, Blockchain

Experience

AccioIbis | Full Stack Developer   Remote | 06/2022 – 07/2023

- Guided the design and development of the application's frontend, ensuring a well-structured project framework, and employing cutting-edge technologies such as **React, Sass, and JavaScript**.
- Build CRUD APIs in Backend for some of the features and integrated third party mailing and calendar service using like **Google and outlook in Node.js, Redis** and deployment using **AWS**.
- Designed modular code components, resulting in a 40% reduction in bug fixes and enabling seamless integration of new features, enhancing overall user experience and increasing customer satisfaction.
- Implemented CI/CD pipelines for frontend deployments, orchestrated agile methodologies and led daily stand-ups, driving collaboration among cross-functional teams; resulting in a 30% reduction in time to deliver new features and enhancements.
- Consistently adopted new skills and rapidly integrated emerging technologies to enhance project features and overall performance, resulting in a 25% improvement in project efficiency.

Meru Accounting | Web Developer   Remote | 12/2021 – 07/2022

- Developed and integrated two pivotal sections of the application frontend with backend APIs, fostering a unified user experience.
- This effort primarily leveraged **React and Material UI**, contributed to a 25% increase in project completion.
- Collaborated with a cross-functional team of three members to successfully develop the application, resulting in a 20% reduction in development time.

Madiee Games | Full Stack Developer   Remote | 11/2021 – 02/2022

- Created the frontend for a web-based business development game using **React and Sass**, independently completing the project.
- Collaborated with the design team to implement continuous updates and provide recommendations for project improvement.

Skills

- Programming Languages: C, C++, Javascript, Solidity
- Libraries/Frameworks: React, Node, Express, Sass
- Tools/Platforms: Git, Figma, Postman, VsCode
- Databases: MySQL, Firebase

Projects

- My-Vote: A decentralized voting application build over blockchain for the next generation voting mechanisms (Next.Js, Web3, Solidity). **(05/2022)**
- Assist-ON: A browser extension to empowering the browsing experience with the power of chat-GPT (React, Webpack, Firebase). **(08/2022)**
- Open-Chat: A open chat application to Talk with random people (React, Firebase). **(08/2021)**
